

Sri Lanka: Status of SDG Indicators and Baseline Data

Sustainable Development Council of Sri Lanka
December 2021

Digital Transformation Towards SDG Data Management

- > The greatest challenge in reviewing Sri Lanka's progress in achieving Sustainable Development Goals (SDGs) is the limitations in data, both in terms of availability and frequency of compilation.
- ➤ In 2017, the Report titled 'Status of SDG Indicators in Sri Lanka' issued by the Department of Census and Statistics reported data availability for only 46 SDG indicators out of the 244 SDG indicators proposed by the SDG Global Framework.
- > The Sustainable Development Council of Sri Lanka (SDCSL) has taken the initiative to strengthen SDG Data Governance and Management Systems.
- > The National SDG Data Portal launched by SDCSL is an integrated platform that links all government institutions to a central platform promoting a whole-of-government approach to data compilation and dissemination.

Data Validation Process

- > Through an interactive process initiated in January 2021, SDCSL maps, verifies and validates the data currently available with all government institutions following the three-step process outlined below:
 - Analyzing data requirements of SDG indicators in line with the UN Meta-data Guidelines;
 - Initial assessment to compile Baseline Data available with government institutions through an interactive process;
 - Verifying and validating the Data as official government statistics.
- > In addition, the current data gaps are being identified and initiatives are being taken to develop methodologies to generate and compile data for additional SDG indictors necessary to review progress towards SDG targets.
- > The data process has been supported by the technical and statistical expertise provided by the Department of Census and Statistics, the United Nations Development Programme and other UN Agencies in Sri Lanka.

DATA MAP FOR SDG INDICATORS AS AT 31st December 2021

	1 NO POVERTY	2 ZERO HUNGER	3 GOOD HEALTH AND WELL-BEING	4 QUALITY EDUCATION	5 GENDER EQUALITY	6 CLEAN WATER AND SANITATION	7 AFFORDABLE AND CLEAN ENERGY	8 DECENT WORK AND ECONOMIC GROWTH	9 INDUSTRY, INNOVATION AND INFRASTRUCTURE	10 REDUCED INEQUALITIES	11 SUSTAINABLE CITIES AND COMMUNITIES	12 RESPONSIBLE CONSUMPTION	13 CLIMATE ACTION	14 LIFE BELOW WATER	15 LIFE On Land	16 PEACE, JUSTICE AND STRONG	17 PARTNERSHIPS FOR THE GOALS

Target 1.2 By 2025, ensure that all populations living under the national poverty line in 2020 are lifted out of poverty in all its dimensions.

1.2.1 Proportion of population living below the national poverty line

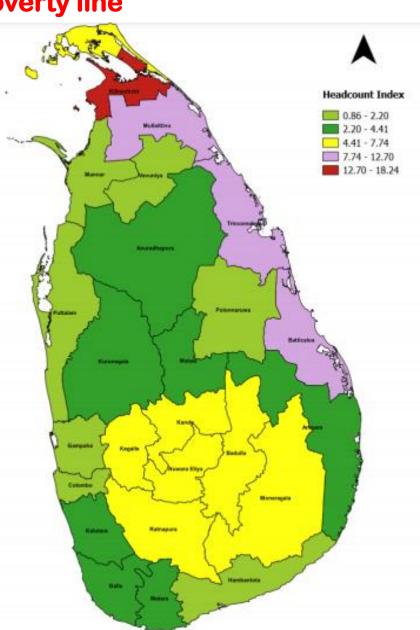

Proportion of Population Living below the National Poverty Line

Poverty line can be interpreted as the minimum expenditure per person per month to fulfill the basic needs

• In 2016, the highest proportion of population living below the national poverty line was recorded in Kilinochchi District (18%), while the lowest proportion of population living below the national poverty line was recorded in Colombo district (0.9%).

Source: Household Income & Expenditure Survey, Department of Census & Statistics and The World Bank, 2013 - 2016

Target 1.2 By 2025, ensure that all populations living under the national poverty line in 2020 are lifted out of poverty in all its dimensions.

1.2.2 Proportion of men, women and children of all ages living in poverty in all its

dimensions according to national definitions

Based on
Multidimensional
Poverty Index

Year	Total (%)	Male (%)	Female (%)
2013	3.8	3.9	3.7

Proportion of Children (Age 5-17) living in poverty

Year	Total (%)	Male (%)	Female (%)
2013	4	4.2	3.8

Multidimensional Poverty Criteria

Health

- 1. Nutrition
- 2. Child Mortality

Education

- 3. Years of Schooling
- 4. School Attendance

Standard of Living

- 5. Electricity
- 6. Sanitation
- 7. Drinking Water
- 8. Floor
- 9. Cooking Fuel
- 10. Assets

1.5 By 2030, build the resilience of the poor and those in vulnerable situations and reduce their exposure and vulnerability to economic, social and environmental shocks and disasters, including climate-related extreme events.

1.5.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population (Repeat 11.5.1/13.1.1) (Proxy Indicator)

Year	Number of Deaths attributed to disasters per 100,000 population	Number of missing persons attributed to disasters per 100,000 population	Number of affected people attributed to disasters per 100,000 population	Number of deaths, missing persons and affected persons attributed to disasters per 100,000 population
2015	0.28	0.01	2402.54	2402.83
2016	0.57	0.55	7372.36	7373.48
2017	1.22	0.70	17765.79	17767.71
2018	0.41	0.07	6582.69	6583.17
2019	0.52	0.04	7441.72	7442.29
2020	0.32	0.00	3585.23	3585.56

 Indicator covers only the hazards related to Animal attacks, Cutting failures, cyclones, droughts, fires, Flash floods, floods, Forest fires, landslides, lightnings and Strong winds in line with the data published in the Desinventar Database of the Disaster Management Centre of Sri Lanka.

Source: Disaster Management Centre- 2015-2020

End hunger, achieve food security and improved nutrition and promote sustainable agriculture Target 2.1 By 2025, maintain self-sufficiency in rice and by 2030, ensure ample supplies of other main food products (such as coconut, coconut oil, meat, fish, egg, milk, fruit, other field crops (OFC) and vegetables), and ensure at least 90 percent of agricultural products meet safety standards; thus ensuring safe, nutritious and ample food supply for all.

Indicator 2.1.2 Prevalence of moderate or severe food insecurity in the population, based on the Food Insecurity Experience Scale (FIES) (Proxy Indicator)

Household Food Security Access Scale Score (Proxy Indicator)

Disaggregation		Baseline Da	la 💮
Level	Unit	Value	Year
Total	Scale	9.2	2013/14

The value of
Household Food
Security Access
Scale Score lies
between 0 and 24.
The maximum
score of 24 implies
that the level of
food insecurity for a
household is
highest.

Source: Food Security Survey, Department of Census & Statistics- 2013/2014

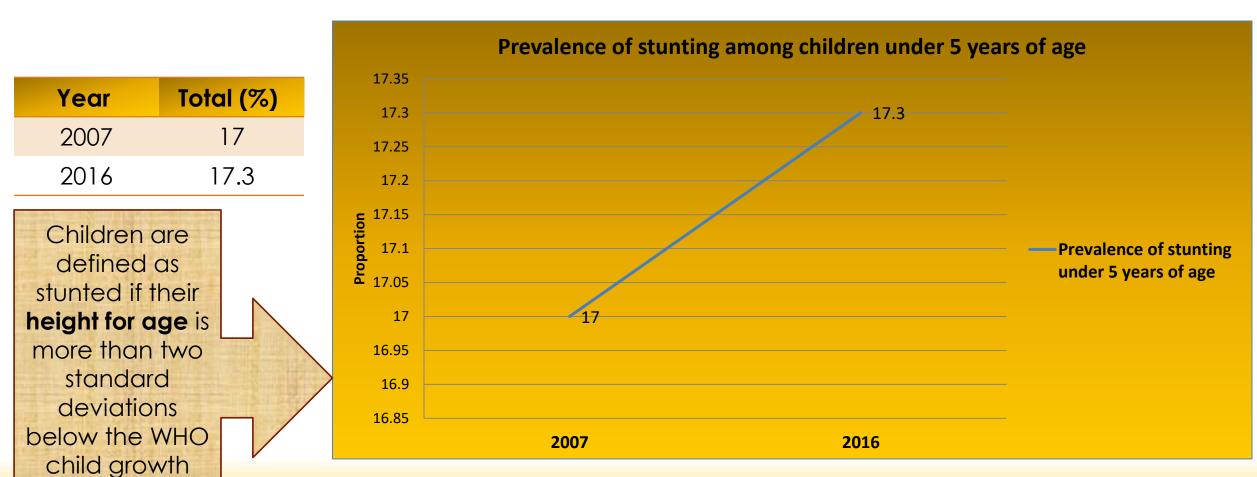

Target 2.2 By 2030, end all forms of malnutrition, including achieving, by 2025, the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons.

Indicator 2.2.1 Prevalence of stunting among children under 5 years of age

standards

median.

Conserve and sustainably use the oceans, seas and marine resources for sustainable development

Target 14.1 By 2025, prevent and significantly reduce marine pollution of all kinds, in particular release of solid waste, waste water, balance water, ship based waste and from land-based activities, including marine debris and nutrient pollution.

Indicator 14.1.1.b Floating plastic debris density by geospatial location

Year	Marine plastic debris Kg per Km
2017	103 Kg/Km
2018	100.2 Kg/Km
2019	95.2 Kg/Km
2020	92.5 Kg/Km

Target to reduce the amount of marine litter (plastic) accumulated at one kilometer highly polluted costal beach stretch by 2025.

Source: Marine Environment Protection Authority 2017- 2020

Target 14.2 By 2022, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration in order to achieve healthy and productive oceans.

Indicator 14.2.1 Proportion of national exclusive economic zones managed using ecosystem-based approaches.

 25 % (343.52 Km) of total coastal length belongs to the protected area network of Department of Wildlife Conservation. (25% only for DWC) Target 14.3 Minimize and address the impacts of ocean acidification, including through enhanced scientific cooperation at all level

Indicator 14.3.1 Average marine acidity (pH) measured at agreed suite of representative sampling stations

Year	Average Annual Sea Water pH Level		
2017	pH 8.0		
2018	pH 8.0		
2019	pH 8.0		
2020	pH 8.2		

Maintaining an average annual sea water pH level above 8 until 2025

Target 14.4 By 2022, effectively regulate harvesting and end overfishing, illegal, unreported and unregulated fishing and destructive fishing practices and implement science-based management plans, in order to restore fish stocks in the shortest time feasible, at least to levels that can produce maximum sustainable yield as determined by their biological characteristics.

1. Pelagic fish biomass estimated by Acoustic Methods (2019/2020)

Coastal Area	Year	Biomass of Small Pelagics: PEL1 (Metric Ton)	Biomass of medium Pelagics: PEL2 (Metric Ton)
North East	2019	164.0	7281.0
North East	2020	2240.2	2271.3

- 2. Blue Swimming Crab (*Portunus pelagicus*) fishery in the Palk Bay, Sri Lanka.
- The estimated Spawning Potential Ratio (SPR) for Blue
 Swimming Crab stock is 38% (± 0.003) (2016 Assessment)

Target 14.4 By 2022, effectively regulate harvesting and end overfishing, illegal, unreported and unregulated fishing and destructive fishing practices and implement science-based management plans, in order to restore fish stocks in the shortest time feasible, at least to levels that can produce maximum sustainable yield as determined by their biological characteristics.

Indicator 14.4.1: Proportion of fish stocks within biologically sustainable levels

3. Lobster (*Panulirus Homarus*) stock assessment results in Hambanthtoa district, Sri Lanka from equilibrium Spawning Potential Ratio (2021 study)

Year	Spawning Potential Ratio
2007	22% (20% - 24%)
2014	18% (15%- 22%)
2015	17% (15% - 19%)
2017	20% (19% - 21%)
2018	27% (24% - 31%)
2019	21% (20% - 23%)
2020	27% (23% - 31%)

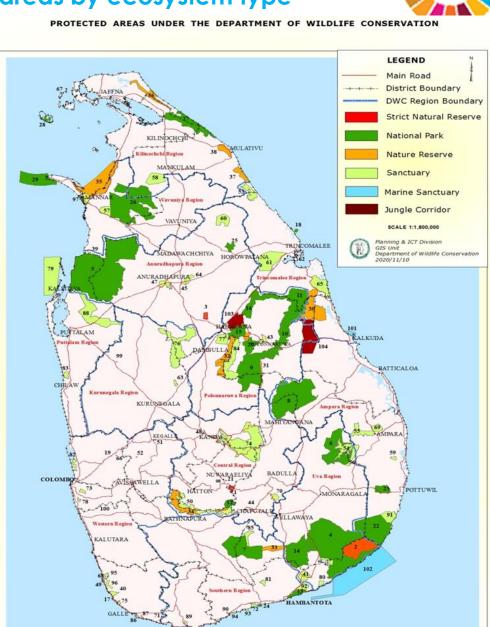

Conventional reference points	SP proxies
Precautionary and rebuild SPR	60%
Precautionary Maximum Sustainable / Economic Yield	50%
Upper Target Reference Point (Maximum Sustainable Yield -MSY)	40%
Lower Target Reference Point (Maximum Sustainable Yield - MSY)	30%
Limit Reference Point (LRP)	20%

Target 14.5 By 2022, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information.

Indicator 14.5.1 Coverage of protected areas in relation to marine areas by ecosystem type

- Department of Wildlife Conservation (DWC) possesses a marine area of 164286.08 ha. Even though, only three of the protected areas have been particularly declared as marine protected areas (Marine national parks: Adam's bridge, Marine sanctuaries: Kayan Kerni, Maharawana Kudarawana), some of the other protected areas also should be taken in to consideration as they also contain a marine component (Ex: lagoons, estuaries).
- The marine area belonging to DWC has increased significantly from 2010. DWC is in the proses of declaring more marine protected areas (Mirissa and Wilpattu marine sanctuaries). Marine strict nature reserves and marine wilderness areas have not been declared so far.

Source: Department of Wildlife Conservation - 2020

Target 14.6 By 2022, prohibit certain forms of fisheries subsidies that contribute to overcapacity and overfishing, eliminate subsidies that contribute to illegal, unreported and unregulated fishing and refrain from introducing new such subsidies, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of the World Trade Organization fisheries subsidies negotiation. Indicator 14.6.1 Degree of implementation of international instruments aiming to combat illegal, unreported and unregulated fishing (Proxy Indicator)

• The level of compliance with the relevant laws and agreements by the Indian Ocean Tuna Commission on Fisheries Industry in Sri Lanka.

Year	Compliance Rate

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss

Target 15.1 By 2022, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and dry lands, in line with obligations under international agreements.

Indicator 15.1.1 Forest area as a proportion of total land area

Forest Cover	Extent(ha.)	%
Dense Forest	1,435,576	21.9
Open & Sparse Forest	389,561	5.9
Mangrove	19,757	0.3
Savanah	68,075	1.0
Total Forest Cover	1,912,970	29.2
Forest Plantation	99,959	
Rubber	119,548	
Scrubland	372,418	

Source: Department of Forest Conservation - 2020

Target 15.1 By 2022, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and dry lands, in line with obligations under international agreements.

Indicator 15.1.2.a. Proportion of important sites for terrestrial biodiversity that are covered by

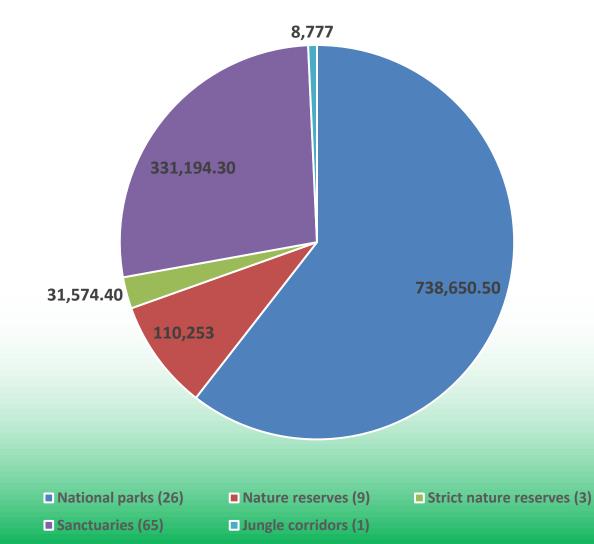

protected areas, by ecosystem type

- Category I: Strict nature reserve
- Category I: Wilderness area
- Category II: National park
- Category III: Natural monument or feature
- Category IV: Habitat/species management area
- Category V: Protected landscape/seascape
- Category VI: Protected area with sustainable use of natural resources

Category	Area (ha)
National parks (26)	738,650.5
Nature reserves (9)	110,253
Strict nature reserves (3)	31,574.4
Sanctuaries (65)	331,194.3
Jungle corridors (1)	8,777
Total area (Marine)	164,286.08 ha
Total area (Terrestrial)	1,056,163.12 ha
Total area (Terrestrial+ Marine)	1,220,449.20 ha

Source: Department of Wildlife Conservation - 2020

Proportion of important sites for terrestrial biodiversity that are covered by protected areas in hectares

Target 15.2 By 2022, promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation.

Indicator 15.2.1 Progress towards sustainable forest management

Sub- Indicator 15.2.1.a. Forest area annual net change rate

Forest Cover	Extent(ha,)
Forest Cover in 2010	1,951,473
Forest cover in 2015	1,912,970
Deforestation Area (Within five years)	38,503
Average Deforestation Area per year	7,701
Annual Rate of Deforestation	0.39%

Sub-Indicator 15.2.1.c. Proportion of forest area located within legally established protect areas

Forest Types	No of Forests	Extent(ha.)	% to total Land Area
Conservation Forest	128	179,916	2.74
Reserve Forest	747	1,155,485	17.61
Total No of Forests	875	2,131,054	20.35

Source: Department of Forest Conservation - 2015

Target 15.5 Take urgent and significant action to reduce the degradation of natural habitats, halt the loss of biodiversity and, by 2020, protect and prevent the extinction of threatened species

Indicator 15.5.1 Red List Index by ecosystems, habitats, and geographic divisions

Conservation status of the assessed vertebrates and invertebrates of Sri Lanka (Endemics are shown in brackets)
