

Sri Lanka: Status of SDG Indicators and Baseline Data

Sustainable Development Council
of Sri Lanka
May 2024

Digital Transformation Towards SDG Data Management

- The greatest challenge in reviewing Sri Lanka's progress in achieving Sustainable Development Goals (SDGs) is the limitations in data, both in terms of availability and frequency of compilation.
- In 2017, the Report titled 'Status of SDG Indicators in Sri Lanka' issued by the Department of Census and Statistics reported data availability for only 46 SDG indicators out of the 247 SDG indicators proposed by the SDG Global Framework.
- The Sustainable Development Council of Sri Lanka (SDCSL) has taken the initiative to strengthen SDG Data Governance and Management Systems.
- The National SDG Data Portal launched by SDCSL is an integrated platform that links all government institutions to a central platform promoting a whole-of-government approach to data compilation and dissemination.

Data Validation Process

- **Through an interactive process initiated in January 2021, SDCSL maps, verifies and validates the data currently available with all government institutions following the three-step process outlined below:**
 - **Analyzing data requirements of SDG indicators in line with the UN Meta-data Guidelines;**
 - **Initial assessment to compile Baseline Data available with government institutions through an interactive process;**
 - **Verifying and validating the Data as official government statistics.**
- **In addition, the current data gaps are being identified and initiatives are being taken to develop methodologies to generate and compile data for additional SDG indicators necessary to review progress towards SDG targets.**
- **The data process has been supported by the technical and statistical expertise provided by the Department of Census and Statistics, the United Nations Development Programme and other UN Agencies in Sri Lanka.**

5 GENDER
EQUALITY

**Achieve gender
equality and
empower all
women and girls**

Target 5.1 End all forms of discrimination against all, irrespective of their age, sexual orientation or gender identity.

Indicator 5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and non-discrimination on the basis of sex

The scoring methodology is the unweighted average of the questions under each area of law calculated by:
$$A_i = (q_1 + \dots + q_{(m_i)}) / m_i$$

Where A_i refers to the area of law i ; m_i refers to the total number of questions under the area of law i ; $q_1 + \dots + q_{m_i}$ refers to the sum of the coded questions under the area of law and where $q_i = "1"$ if the answer is "Yes" and $q_i = "0"$ if the answer is "No".

Target 5.2 Eliminate all forms of violence against all (irrespective of their age, sexual orientation or gender identity) in the public and private spheres, including trafficking and sexual and other types of exploitation.

Indicator 5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months

Ramsar Wetlands				When a wildlife protected area is declared under the provisions of Fauna and Flora Protection Ordinance, it always remains unchanged due to the legal protection gained by the FFPO unless it is being degazetted due to certain national requirements. Seasonal variation can change the existence of eco systems such as willu in dry zone.

Target 14.5 By 2022, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information.

Indicator 14.5.1 Coverage of protected areas in relation to marine areas by ecosystem type

- Department of Wildlife Conservation (DWC) possesses a marine area of 164286.08 ha. Even though, only three of the protected areas have been particularly declared as marine protected areas (Marine national parks: Adam's bridge, Marine sanctuaries: Kayan Kerni, Maharawana Kudarawana), some of the other protected areas also should be taken in to consideration as they also contain a marine component (Ex: lagoons, estuaries).
- The marine area belonging to DWC has increased significantly from 2010. DWC is in the proses of declaring more marine protected areas (Mirissa and Wilpattu marine sanctuaries). Marine strict nature reserves and marine wilderness areas have not been declared so far.
